Re: Comprehensive Plan Growth Tier

Mr. Dalton:

The Carroll County Planning Commission has been reviewing the current Growth Tier map in the Carroll County Comprehensive Plan. The current Growth Tier was created along locations where there is public water available. This has caused a large portion of the county, including many areas that are primarily agriculture areas, to be included in the growth tier. Real growth cannot occur without both public water and public sewer.

The Carroll County Planning Commission would propose that the Growth Tier be revised to include only areas where both public water and public sewer are available. These areas would include the Fancy Gap water and sewage coverage area, the Exit 1 water and sewage coverage area, the Exit 19 water and sewage coverage area, and the Exit 14 water and sewage coverage area extending to Woodlawn west to Galax and including the Gladeville/Cranberry water and sewage coverage area.

The Carroll County Planning Commission would ask that you discuss this issue with the Carroll County Board of Supervisors and advise us of any questions or comments they may have concerning this revision. If the Board of Supervisors is satisfied with this proposal, we need to discuss moving forward with a public hearing on this matter.

Thank you.

Re: Comprehensive Plan -- Transportation and Roads
Mr. Dalton:

The Carroll County Planning Commission has been reviewing the attached SMART Scale projects and the proposed Six-Year Secondary Road Improvement Plan.

The Carroll County Planning Commission would propose to include in the Transportation section of the Carroll County Comprehensive Plan the Route 52 at Poplar Camp and the sidewalk project at Carroll County High School SMART Scale projects and also to include the Six-Year Secondary Road Improvement Plan in the Comprehensive Plan.

The Carroll County Planning Commission would ask that you discuss this issue with the Carroll County Board of Supervisors and advise us of any questions or comments they may have concerning this revision. If the Board of Supervisors is satisfied with this proposal, we need to discuss moving forward with a public hearing on this matter.

Thank you.

Route 52 at Poplar Camp

This project proposes to improve substandard geometrics along a section of Route 52 in Carroll County. Designated as a detour for Interstate 77 in the event of accident or natural disaster causing closure of part or all of the interstate. The daily traffic consists of approximately 800 VPD but when traffic needs to be detoured from the interstate, these counts could increase another 44,000 VPD.

A series of "S" curves, posted with 25 MPH advisory speed limit, along with a steep grade and narrow pavement create a need for this improvement. Trucks hauling single (WB-67) or double trailers (WB-20D) need to use most of the paved surface to negotiate this alignment. To add to the obstacles along this route, the existing terrain consists of large cuts and drop-offs to Shorts Creek and Handy Creek. This makes it extremely expensive widen the existing alignment with blasting, overburden, and environmental impacts to the streams.

Review of the accident reports for this section of Route 52 reveals no accidents for a 3-year period, this would make this project a bad candidate for Smart Scale but a review of accidents on I-77 paints a different picture. Luckily, there have been no fatalities but 99 crashes have produced 23 injuries. Each of these accidents provided a potential detour onto this substandard roadway.

This project proposes to start just north of the intersection with Pleasant View Road and align on new location tying back to Route 52 past the entrance to the quarry. This would move the roadway and construction activities away from the streams and reduce the amount of rock and regular excavation required for construction.

Narrative for SmartScale sidewalk project at Carroll County High School

The intent of this project is to continue the pedestrian corridor from the high school to the Town of Hillsville by providing a raised pedestrian island for the crossing on Route 58 from the high school to the athletic training fields and providing a hard-surfaced pedestrian accommodation along Route 58. The total length of the project will be approximately 1600FT of a 5ft wide hard-surfaced walkway on the existing terrain. In order to cross Beverdam Creek, VA Structure 1037, Federal ID 4547 will need to be widened on the south side about 8ft to provide sufficient space for the 5ft sidewalk and railing. Construction of the sidewalk will begin at the parking lot near the CCHS tennis courts and head west following the existing grade, close to the toe of fill along Route 58. After crossing the bridge, the project will continue across the newly constructed raised concrete islands in front of Southern States. Crossing Fulcher Street, the sidewalk will continue to the paved entrance at Southern States entrance and connect to existing sidewalk at the egress from Knob Hill Motor Lodge. The existing sidewalk to the west will need to be update to the current ADA ramp requirements along with the raised traffic control median at the intersection of Route 58 and Route 221 where the signal modifications include push button request and a pedestrian phase. Review of the Carroll County GIS maps and State Projects 0058-017-102, C501 and 0058-017-108, C501 revealed the right of way is limited and may require additional impacts. Construction will required lane closures and possible flagging in the area of the Route 221 intersection.

Steve,

I've attached a draft plan for the Board's consideration at their May meeting. Given the large number of projects that were added last year, and considering the limited dollars available, I could not add every project requested.

I have proposed the addition of Route 608 (Old Appalachian Trail), Route 633 (Groundhog Mountain), Route 683 (Millstone), and Route 706 (Glade Creek). Please let me know if you have additional questions.

Lisa - Listed below are the roads that the Board would like added to the Six Year Road Plan. If you can get me a new document, I will get it in for the June Board Meeting

Thanks!

Crystal

Rt. 608 Old Appalachian Trail
Rt. 835 Dust Trail
Rt. 615 Little Valley Rd.
Rt. 736 River Hill (From end of the paved section to the Bylesby Boat Ramp)
